

All Weather Fabric

™

BENNINGTON

WHAT IS SURLAST® ALL WEATHER FABRIC?

SurLast® All Weather Fabric is a 100% solution dyed polyester that is made in the USA, and is the best fabric to provide your boat with the protection it deserves. Solution dyed means that the color is actually added to the polyester before the yards are even spun, therefore it will not fade or wash out. SurLast® was specifically developed for the marine industry, and has now become the choice fabric for many of the highest quality boats manufactured today. SurLast® has a light urethane coating on the back side that adds strength and stability to the weave. The coating also makes it the most water resistant and breathable product on the market today.

NOTABLE FEATURES

- High UV Fade Resistance
- Highly Water Resistant
- Mold & Mildew Resistant
- Excellent Abrasion Resistance
- Dimensionally Stable (less than 1% shrink & stretch)
- Will Not Wash Out or Transfer Color

CLEANING INSTRUCTIONS

SurLast® is designed to be easy to maintain. It can be washed, or brushed off and rinsed. Proper care and cleaning is important to the life of SurLast® fabric. For normal care and cleaning add two ounces of mild soap to one gallon of lukewarm water. Clean the fabric with a soft bristle brush. Rinse thoroughly with cold water and air dry. For stubborn stains add a maximum of one cup of bleach to one gallon of water. Spray lightly on the fabrics "face" (the side that faces the sun). Do not soak the fabric. Prolonged exposure to harsh chemicals can damage the coated side of the fabric. Rinse immediately. Do not leave on for more than two minutes. Cleaning with harsh chemicals such as bleach may require retreatment to restore the water repellency, 303 High Tech Fabric Guard is recommended.
