BOATS AT VARIOUS PRICE POINTS

Bennington's 2275RLi

One look at the 2275RLi tells you all you need to know about this 'toon: it can flat-out fly. The shiny triple-pontoon base combined with a richly colored exterior makes it seem like the boat is begging you to take it out on the lake and push her to the limit.

Bennington is known for quality, so it comes as no surprise that the 2275RLi comes standard with a 10-foot bimini top with embroidered boot, quick-release fittings and a one and a quarter-inch frame, six-inch Bennington stainless steel cleats, stainless corner castings, Playpen cover, streamline rail system and much, much more. Sixteen-inch on-center main cross members and a through-bolted chassis support the top deck.

Rated up to 250hp with the ESP Elliptical Sport Package, this boat is built for speed. Bennington constructed the 2275RLi ESP with displacement in mind. The ESP package includes a 32-inch elliptical center tube, two 25-inch outer tubes, performance foils, Sea Star hydraulic steering and an under-deck waveshield to further reduce drag.

But just because this boat was designed to scream across the water doesn't mean Bennington scrimped on style or comfort. The two chaise lounges up front have plenty of underneath, ventilated storage, while LED mood lighting can set the atmosphere at your next on-water party. A mahogany kidney table and mahogany-accented portable cup holders make the interior pop.

Console features include a 12-volt outlet, automotive-style console cap, analog gauges, speedometer, depth graph, locking wallet box, locking side-access storage

\$41,092

and Sony GT series CD with MP3 and four speakers with color-matched speaker grills.

The Bennington 2275RLi with Yamaha 150TXR four-stroke and ESP Elliptical Performance Package is \$41,092.
